

End-of-Life BUM 60 Servo Converter

Dear customer,

The analog working ac converter BUM 60 (04037459) has in former times been fit in ROVEMA packaging machines. Unfortunately our supplier has stopped the production of this component some years ago. Even though we have stored a lot of these converters our stock for the spare part supply is now used up. Due to intense negotiations the supplier is willing to produce this component a last time (EOL-order). We are glad that we are able to inform you today with this information sheet about this possibility and the alternative.

- Since the 90th the ac converter BUM 60 works as a reliable component at the command of the servo drives in different applications on ROVEMA packaging machines.
- A limited contingent of BUM 60 units will be at our disposal at a last order. Please take advantage of this unique offer, enabling your company to avoid a potential machine down-time.
- Alternative for a 1:1 exchange, at breakdown of the unit, will be a large conversion kit for the relating drive unit, consisting of a new generation converter as well as a new servo motor, gear box and the appropriate service work.
