

Stabilo Seal® Stand-Alone Unit

Dear customer,

Every product can be additionally upgraded through the high-quality and innovative ROVEMA Stabilo Seal® and Ropack bags and, thanks to a visually appealing packaging, attracts customers' attention at the point of sale.

The new ROVEMA Stabilo Seal® stand-alone unit can be flexibly used with all continuous form, fill and seal machines for the production of premium bags. Thus the lucrative Stabilo Seal® or Ropack function no longer has to be retrofitted separately on every machine. The completely independent system can be placed and operated as required behind form, fill and seal machines by ROVEMA or other manufacturers.

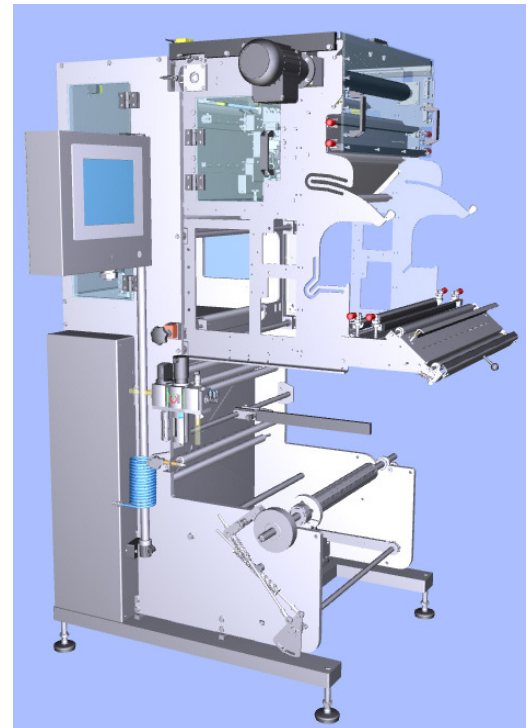

Moreover, the premium bag forms can usually be produced while maintaining the existing format sizes as well as the round or oval forming sets. Thanks to an unchanged machine height and drop height of the product, your possibly fragile product can still be filled and packed in a gentle way.

The Stabilo Seal® stand-alone unit offers you:

- innovative and attractive packaging shapes without a complex modification of the form, fill and seal machine
- completely independent system with separate control
- usable with different machines in alternating operation
- unchanged drop height of the product
- unchanged bag cross section
- optimal cross section of the filling tube

The retrofit kit consists of:

- base frame with electrical cabinet and control unit with operating display
- add-on module with forming and sealing tools
- support for printer as well as cutting and gluing device for the film
- protective housing with safety circuit
- pneumatic film reel shaft
- forming parts for one bag size (Stabilo Seal® or Ropack)
