

## Upgrade for Drive of ROVEMA VPI260 Machine

Dear customer,

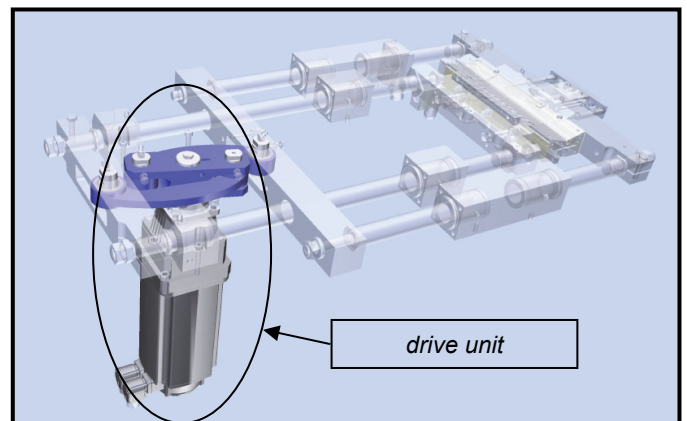

Time and time again technical innovations for new machines are developed. We would like to offer these also to our customers with older ROVEMA machines. One of them is our sophisticated package for VPI260 machines, consisting of a conversion kit for the drive unit and a corresponding software package, with which completely new possibilities regarding your VPI260 will open up to you. Product detection *Sense & Seal*<sup>®</sup>, increase of sealing power up to 6000N and *Premium Seal*<sup>®</sup> function are just some of the many advantages of this package.

### The conversion to a new VPI260 drive offers you:

- increase of the machine efficiency with *Sense & Seal*<sup>®</sup> by less downtimes
- reduction of contamination of cross sealing tools by product detection during the sealing process
- less wear-out of cutting knives and cross sealing tools
- *Premium Seal*<sup>®</sup> for optimal and individually programmable sealing processes
- sealing power up to 6000N

### The conversion kit contains:

- conversion kit for the drive unit with motor, drive, crank, connecting rods and bearing
- servo amplifier, control unit, cable set
- modification of electronic system with new wiring diagram and software package

*cross seal station VPI260*

The above mentioned offer is valid for VPI260 machines with P@ck-Control. The cost for installation and start-up (approx. 2-3 days) will be invoiced separately on a time and material basis.

Optionally, an increase of the sealing power up to 8000N is possible. On request we will gladly check whether this option is technically feasible at your machine.

For more information about the upgrade for the VPI260 drive as well as prices and delivery times or in case of questions regarding your ROVEMA packaging machine your contact persons at ROVEMA service are always at your disposal.
