

## Vacuum Closing System for Auger Doser

Dear customer,

A compact and dust-free product filling is no longer an unsolvable task! With the new ROVEMA vacuum closing system for auger dosings, undreamt-of possibilities for the filling of powdery products will open up to you.

We offer you a retrofit kit with which you will be able to provide your ROVEMA auger dosing with a vacuum closing system. You will immediately benefit from the advantages of the system!

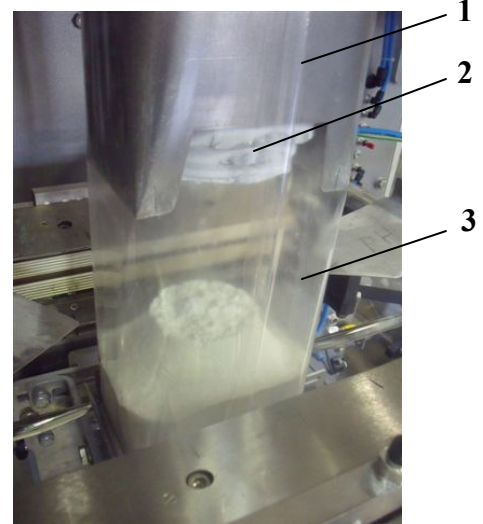

Product types like flour, milk powder and baby food already belong to our field-tested references.

### **The Vacuum Closing System offers you:**

- closing system without movable parts
- better quality of seal due to a dustless dosing without trickling out effect
- compact product filling
- up to 20% film savings potential (product-specific) because of shorter bags
- possible increase of output (depending on product type)
- higher dosing accuracy

### **The retrofit kit consists of:**

- vacuum unit as one-time retrofit kit, including electrical, mechanical and pneumatic equipment
- set of auger forming parts with vacuum closure as complete format change set

- 1 – VP forming tube**  
**2 – vacuum closure**  
**3 – dust-free filling process**

On request we will gladly prepare a customized offer for installation and start-up on site.

For more information about the vacuum closure system as well as prices and delivery times or in case of further questions about your ROVEMA packaging machine, your contact persons at ROVEMA service are always at your disposal.
