

Wear Part Kit for Vacuum Pump

Dear customer,

An essential determinant for a high productivity and a constant functioning of your ROVEMA packaging machine is a continuous supply with high-quality and original ROVEMA spare and wear parts. This applies especially to parts which are critical for production such as the vacuum pump, whose failure unavoidably leads to a breakdown of the complete machine.

Therefore, we have compiled a wear part kit especially for the vacuum pump so you will have direct access to the required parts if necessary and be able to immediately exchange them. This way you effectively prevent unplanned downtimes and loss of production.

Our wear part kit for the vacuum pump offers you:

- optimal selection of parts for regular maintenance of the pump
- secured production through a preventive exchange of parts
- avoidance of unplanned downtimes
- constant functioning of the machine
- price advantage

wear part kit

The wear part kit consists of:

- 1 set of rotor blades (7 pieces)
- filter cartridge
- set of washers

vacuum pump

We will gladly issue an offer for an exchange of the parts on site at your ROVEMA machine by one of our service technicians.

For more information about the wear part kit for the vacuum pump as well as prices and delivery times or in case of questions regarding your ROVEMA packaging machine, your contact persons at ROVEMA service are always at your disposal.
