# ROVEMA TRAININGS

---

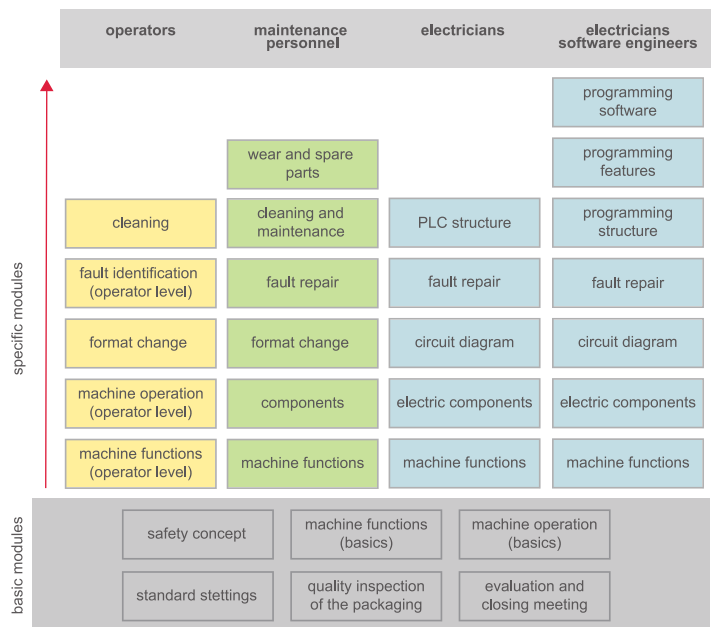

# OUR CONCEPT

**innovative  
interactive  
individual**

The continuous development of digital communication is a great challenge for machine manufacturers. In order to meet this challenge the new *ROVEMA training* department was founded within the ROVEMA GmbH at the beginning of 2018. It is our answer to the important question of knowledge transfer in the age of Industry 4.0 with its increase of complex machine systems.

The innovative and multimedia-based trainings are tailored to the user and provide for an interdisciplinary transfer of special knowledge in a practice-oriented way. They offer an effective learning environment through small groups, profound know-how from trained instructors and certified knowledge thanks to professional training material

The ROVEMA trainings are composed in a modular way and thus allow for a flexible adaptation to individual customer requirements. Moreover, mixed learning groups consisting of different customers can be trained in an optimal way. We are focusing on trainings at ROVEMA in Fernwald, Germany. We are convinced that this offers you the maximum benefit since this is the way your personnel will gain the best from the experience of our trainers and the availability of further specialists if required. However, upon request it is still possible to carry out a training on your site.

## Trainings mixed customer groups

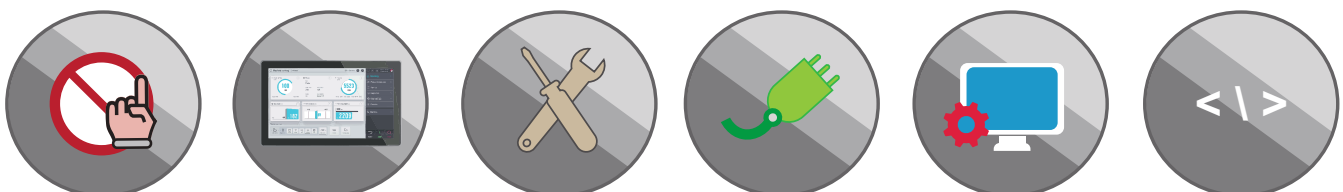

Mixed trainings for machine control/programming and form, fill and seal machines will be offered every year on fixed dates at ROVEMA in Fernwald. Professional training material as well as meals and drinks for the complete duration of the training are included.

You can find an overview of all dates on [www.rovema.com](http://www.rovema.com). Please feel free to contact us at any time for registering one or more employees for the desired training.

## Trainings single customers

We gladly offer individual trainings for your personnel from the areas of operation, maintenance, electronics or machine control/programming. Duration, content and language of the training will be customized according to your machines and requirements.

In addition to having more flexibility regarding the composition of a training, you have the possibility to order multimedia-based training material especially for your machine. This includes professional videos which illustrate individual work steps and thus facilitate an efficient and long-lasting transfer of knowledge.

## GOOD REASONS

### 1 Profound know-how

Experienced trainers pass on their comprehensive knowledge to your personnel.

### 2 Professional documents

Illustrative and informative training documents clearly summarize the lessons learnt and thus enhance the self-learning competence of your personnel.

### 3 Effective programs

Theory and practice are connected in an optimal way and support joined-up and interdisciplinary thinking.

### 4 Multimedia-based learning

Innovative video material illustrates individual work steps.

### 5 Increased efficiency

Trained personnel are the key to an efficient operation of your ROVEMA machine, generating process reliability and security of investment for your company.

### 6 Training as motivation

Certified staff are motivated staff. This ensures a better availability of your ROVEMA machine.

## Advantages of trainings at ROVEMA in Fernwald

### Get to know the world of ROVEMA

We show you our production halls and the technology center. If required, we will demonstrate special applications and machine functions.

### Learning without interruptions

Perfectly prepared training rooms, available machines and an environment apart from the daily production create an effective learning environment without interruptions.

### Interactive transfer of knowledge

With various multimedia-based tools knowledge can be actively acquired with all senses. Experts are available right away in case of special questions.

### Training as recognition

Reward your staff! Participating in a training in Fernwald will update the skills and boost the motivation of your employees! Thereby you can increase your staff retention rate.
